LOC                location of plantations (by river or creek)  
MAINPROD        main product of a plantation

## **SOURCE ORIGINAL DATA**

ACCNR            archive access number  
INVNR            inventory number  
PAGENR          page number (folio)

## **NOTES**

\* In some case the names of the plantations themselves were listed. This happened, for example, because ownership of a plantation was divided over three or more different families. Name spelling has been standardised (see: finding aid 'list\_of\_owner\_names.pdf')

\*\* Until 1698 children were not listed separately.

\*\*\* From 1698 tot until 1701 children younger than 15 were listed, but with no distinction between children of owners and enslaved. To provide this distinction for those years, estimates have been used based on the record for 1701 and averages for the years 1701-1733 (see the website for details about this distinction).

~ Details about the calculations resulting in these estimates can be found on the website.
